SPRING — 1942

Scott's SEED FOR SUNNY LAWNS

This is the finest blend of grasses for open or lightly shaded lawns. Triple cleaning makes it 99.91% weedfree. Its choice perennial grasses build permanent and deep-rooted turf. The content of Creeping Bent adds sparkling color and increases resistance to weed invasion.

Scott's SEED FOR SHADED LAWNS

The best selection of special perennial grasses for areas receiving less than half a day of sunlight. Produces brilliant green lawns under trees and between houses. This grass harmonizes in color and quality with turf produced by other Scott Seeds. It is guaranteed 99.91% weedfree.

Scott's CREEPING BENT SEED

For over 20 years Scott's Creeping Bent has been making velvety home lawns and championship golf putting greens. Suitable for building new lawns or sowing into old lawns in full sun or partial shade. Goes twice as far as other seed, so less is required—see rate chart on other side.

Scott's TURF BUILDER

Proper feeding each spring and fall brings out the full beauty of a lawn; makes it thick, weedfree. Turf Builder supplies all needed elements in correct proportions for grass and trees. Its double action gives quick stimulation plus long lasting nourishment.

Turf Builder is economical because it feeds three times more lawn than ordinary fertilizers. Ten pounds is enough for 1,000 square feet of established grass. See rate chart on other side.

WHITE CLOVER Is not used in Scott mixtures because it is better sown alone. Good seed is high and scarce.

SPREADERS Sow Scott's Seed and apply Turf Builder evenly and accurately. See illustrations and prices on other side.

LAWN CARE All bulletins to date assembled in a file with heavy paper binding at 25c and in a de luxe, loose-leaf binder at \$1.

Less house, walk, driveway, gardens, etc. (one-third)	2,400 sq. ft.
Actual lawn area	4,800 sq. ft.

Requirements for starting new lawn on this size lot: 100 lbs. Scotts Turf Builder and 25 lbs. Scotts Lawn Seed. Use about half these amounts for improving existing lawns.

Complete Directions Included in Every Package of Scotts Seed and Turf Builder

This pile of *Seed* went to market

and this pile of *Weeds* stayed home

We have been going in rather heavily for Mother Goose at our house lately so you'll recognize the above as borrowed property. Incidentally more and more home-owners in referring to Scotts Lawn Seed are crying, "I want some."

This growing demand for Scotts Seed is due to its superior quality resulting from skilled recleaning. We are removing weeds from seed which even ten years ago could not be taken out.

How do we do it? By different processes of screening, blowing, gravity machines, tilting belts, moist canvas - new ideas applied to old equipment and old ideas applied to new. It is a science just like your business or any other; reasonably simple if you know how and terribly confusing if you don't.

Then there must be a big difference in seed quality? Yes, a startling difference; as much as between a masterpiece and the beginners copy; as much as between mother's cooking and the hash from a third rate restaurant.

Does every firm selling seed do the same things to it? Not one in a hundred attempts any of its own cleaning. Not one in five hundred has adequate equipment to do a thorough job. And not one in a thousand cleans seed and then distributes it to the individual home owner. We do not know of another concern whose operations parallel ours.

The purest seed costs less in the long run. There is no doubt about that. You sow less of it and you sow what you are willing to reap. When impure seed is used chaff and weed seeds are scattered profusely; one is pure waste and the other brings lawn disaster.

Lawns have a great appeal this year. They are the home front affording not only beauty but a release from present day pressure. A Scott Lawn is more than ever a prized possession.

Cordially yours

O M SCOTT & SONS CO
